

The Intelcius Refurbishment Program is a service that allows your used Intelcius systems to be inspected and refurbished for your re-use. Ask us how we can have a positive effect on your company's bottom line.

Many Intelcius systems and components can be used repeatedly. We know everyone is looking to save money where they can and some can be saved on Intelcius shipping containers and components. Where collection of used systems and return logistics permit, a controlled process of inspection and qualification for re-use can allow some whole systems and selected components to be re-used. Intelcius can provide those services at our place or train your staff to evaluate and assess the condition of the solution and confirm its suitability for re-use at any or all of your company sites.
